TLA7000 Series Services

Get the most out of your TLA7000 with Tektronix Service expertise.

Optimize your productivity and capital investment.

Advanced measurement systems require precision and accuracy. That's why you've chosen the superior technology inside the Tektronix TLA7000 Series logic analyzers. Now make the most of that technology with comprehensive installation and configuration services from a TLA Certified Customer Service Engineer (CCSE).

- ▶ **Peace of Mind at System Power Up.** Your Tektronix CCSE will not only be there for power up but will debug any problems that arise.
- ▶ **Maximize productivity.** Accelerate ROI by keeping your own engineers focused on the important things, like getting your product to market.
- ▶ **Enhance knowledge and usage.** Your Tektronix CCSE will demonstrate key functionality to your engineers, ensuring peak performance from both the instrument and its users.
- ▶ **Manage your bottom line.** Tektronix provides the industry's only flat-fee installation and configuration service available. One price guarantees perfection with no surprises.

Program Overview

Site Preparation. Prior to installation, your CCSE will call you to verify that all the necessary equipment has arrived, power and service needs will be met, confirm any unique requirements you may have of your new system, and provide a detailed explanation of what you can expect during installation process.

Installation/Verification/Debug. Once on site and unpacked by your CCSE, the TLA equipment will undergo a thorough battery of installation, testing, configuration activities. We ensure that your new system fully conforms to factory specifications with the first power-up, in addition to debugging any issues that might arise.

User Familiarization. The special attention doesn't end there. Your CCSE remains on site to help familiarize your users with the enhanced features and functionality.

Documentation. At the end of the process, you will receive a signed checklist documenting the complete installation provided.

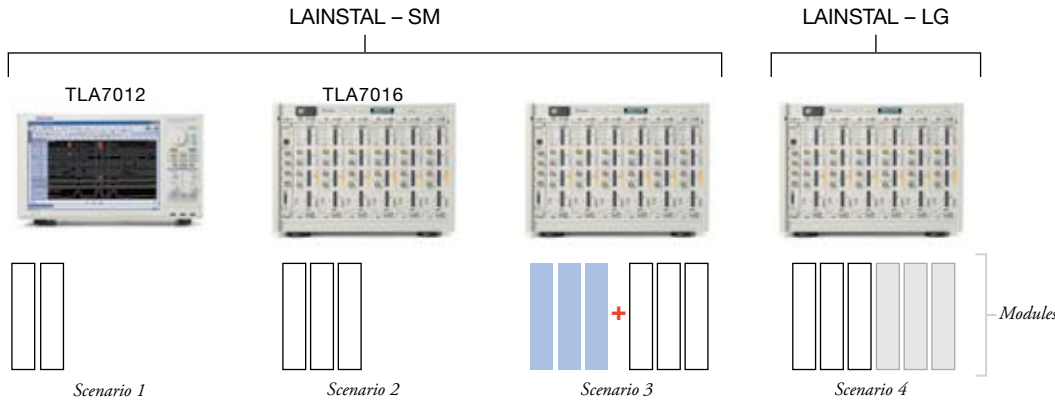

Program Options

There are two flat-fee services programs available at the time of purchase: LAINSTAL-SM and LAINSTAL-LG. Each service program is tied to a single mainframe and its respective module. If there are multiple mainframes to be installed at the same location at the same time, then a LAINSTAL-SM or LAINSTAL-LG would be required for each mainframe.

Configuration Options

Making the right decision for your application.

Product	Description
LAINSTAL - SM Scenarios 1-3	Basic installation and configuration of a single TLA portable or bench-top mainframe and up to 3 modules. This service program can also be used for installing 1-3 modules in existing mainframe.
LAINSTAL - LG Scenario 4	Extensive Installation and configuration of single TLA bench-top mainframe and 4-6 modules.

Trust Tektronix

Tektronix is uniquely qualified to both install your TLA system, and make any future updates to the instrument firmware, operating system and application software (where applicable). Certification by Tektronix verifies your instrument to its original factory specifications, fully traceable to the National Metrology Institute, providing the confidence you need for your critical measurement applications.
